

Certificate III in Carpentry

Course Description

The Certificate III in Carpentry is designed to provide students with the practical skills and knowledge required to work effectively in the building and construction industry. Students will gain hands-on experience in various carpentry tasks, including constructing, installing, and repairing wooden structures and fixtures. The program emphasizes industry standard practices and workplace safety to prepare graduates for employment in residential and commercial projects.

What will I learn?

34 units of competency: 27 core units + 7 electives

- A minimum of five units must be selected from Group A
- The remaining can be selected from Group A or Group B

This is a trade qualification for carpenters in residential and commercial workplaces. It includes setting out, manufacturing, constructing, assembling, installing and repairing products made using timber and non-timber materials.

Employment pathway from the qualification
